Delighted Pet Owners have this to say after using the WARM PET PAD

*"Cat loves it, hasn't moved off
it since we got it - all seven
want one."*

*"Newborn tiny cat, too small to
keep with litter, saved his life!"*

"Care for young sick birds."

"They are excellent for reptiles."

*"Australian made - good on
you!"*

"...keep baby wombat warm."

*"First decent night's sleep we've
all had, now that the cat's
happy!"*

Pets love their own warm cosy place

A warm pet pad will give your pet a cosy place of their own and can be used indoors or out of doors - in a sheltered position. They can be used on the floor, in your pet's basket, bed, kennel or box. The Australian designed and made WARM PET PAD utilises tough high impact polystyrene casing and features a triple protected power cord.

Just a few cents keeps your pet warm

The WARM PET PAD design is so efficient, it only costs around 25 cents per week to operate day and night! Just a few cents a week will keep your pet warm, comfortable and healthy.

Operating guide.

Simply place the heating pad in a draught free location on the floor, in your pet's basket, box, kennel or cage. Plug in the WARM PET PAD and it can be left on continuously during cold weather or whenever required. If used outside, make sure that the pad is in a sheltered position out of the rain, wind and direct sun light. Do not place more than one layer of cover over the WARM PET PAD as this will act as an insulator and prevent correct operation.

Australian made to meet Australian safety standards.

You can rest assured of the safety, high quality and performance of your WARM PET PAD. The Thermofilm WARM PET PAD is proudly Australian designed and made. Meeting the Australian Standard AS3100-1990 it also has Australian electrical approval reference CS920287V.
